SMART AGRO Community

Smart Tool for Myanmar Farmers

Objectives

- ☐ To identify crop diseases and pests with AI, then get treatment and prevention methods
- ☐ To obtain expert review and analysis of field cases
- ☐ To display regional plant and crop outbreaks on a heatmap
- ☐ To build a farmer-to-farmer community for sharing problems, experience and solutions
- ☐ To ask weather and farming advice in Myanmar through the AI advisor Uncle Sprout
- ☐ To increase digital knowledge for farmers with the help of AI

Functions

For Farmers

- ☐ Identify crop diseases and pests with AI
- ☐ Ask Uncle Sprout for weather and farm advice
- ☐ Share problems and solutions with other farmers
- ☐ Study diseases and pests in the Knowledge Center
